Education

Birla Institute of Technology, Mesra *Bachelor of Technology in Computer Science Engineering* 2023 – 2027
CGPA: 8.35/10
CBSE Class XII (2023): 89.8% | Rotary International School
CBSE Class X (2021): 94.5% | Bright Land School

Professional Experience

SDE Intern
May 2026 – Aug 2026
Indian Institute of Technology Jammu, Department of CSE *Jammu, India*

- Engineered DevMind AI, a multiagent developer platform using FastAPI, LangGraph, Gemini 1.5 Flash, enabling semantic codebase understanding, automated CI/CD generation, and vulnerability analysis.
- Designed a production-grade Retrieval-Augmented Generation pipeline using ChromaDB and Google Generative AI Embeddings with asynchronous indexing, achieving sub-3-second semantic query latency.

Artificial Intelligence Intern
Nov 2023 – Jan 2024
Corizo Edutech Private Limited *Remote*

- Built supervised machine learning models for cardiovascular disease prediction using feature engineering and cross validation across multiple clinical datasets.
- Developed a K-Means clustering pipeline for Spotify audio analysis and improved prediction reliability through iterative feature engineering and model evaluation.

Projects

CyberPaste *Next.js • TypeScript • Supabase • PostgreSQL • Gemini API* Live | GitHub

- Engineered a production-grade AI-powered secure pastebin featuring AES-256 encryption, multi-file uploads, syntax highlighting, expiration-controlled sharing, and role-based access control for 200+ active users.
- Integrated an LLM-powered code analysis assistant providing syntax correction, complexity estimation, and debugging insights, significantly improving developer productivity.

LLM-Powered Notes App with Podcast Synthesis *FastAPI • Next.js • LangChain • Gemini* GitHub

- Built an AI-powered Retrieval-Augmented Generation (RAG) pipeline that converts uploaded PDFs into conversational podcasts using Gemini.
- Developed semantic document retrieval using ChromaDB and LangChain while maintaining sub-2-second response latency across large multi-document datasets.

Visionary Spaces *Three.js • React • Blender • JavaScript • WebGL* Live | GitHub

- Developed a browser-based 3D interior design platform enabling real-time room visualization using Three.js and WebGL.
- Achieved 9th National Final Position recognition at ReelCode Project-A-Thons 2025 for innovation in browser-native 3D visualization.

Skills

Languages: Java • Python • TypeScript • SQL • C
Frameworks & Libraries: React.js • Next.js • FastAPI • Express.js • Tailwind CSS
Generative AI: LangChain • LangGraph • Retrieval-Augmented Generation (RAG) • Prompt Engineering
Databases: PostgreSQL • MySQL • Supabase
Developer Tools: Git • GitHub • Linux • Postman
Cloud: AWS • GCP • Azure

Achievements

- Secured 1st Position All India at Project DevMind, hosted by Indian Institute of Technology Jammu, I3C Jammu, and Techible, for developing an AI-powered multiagent developer platform leveraging Generative AI and RAG.
- Secured 9th Place Nationally at ReelCode Project-A-Thons 2025 for developing Visionary Spaces, an interactive browser-based 3D interior design platform powered by Three.js.
